

Is your future secure? We are Tse Consulting and we help organizations solve today's application security challenges in order to achieve a secure future.

TSE & TSE Business and Technology Consulting Inc., has over 10 years' experience in providing professional IT Services with a focus in Access Identity Management. Our clients include Fortune 500 companies, Government agencies and well known system integrators. Tse & Tse consultants are professionally certified, for various project roles including PMP, Open Group Certified Architect, Professional Engineer, and Masters in Management, CISSP, SiteMinder® and IdentityMinder® accreditations. We support SiteMinder®, Cyberark®, Sailpoint®, OIAM®, and LDAP in Access Identity Management projects and operations, based on the client's needs. **What sets Tse and Tse apart from other providers is our up to date technical solutions combined with deep implementation experience in larger organizations.**

HIGHLIGHTED CUSTOMER EXPERIENCE

Case 1: LARGE ENERGY PIPELINE COMPANY

Problem: Large Company Identity Access Management Security Infrastructure is outdated. There are numerous moving parts including applications, web servers, application servers, IAM software, databases, LDAP repositories, Unix and Windows Servers etc.

Solution: Security Infrastructure Upgrade. Develop migration plan and strategies. Execute with care.

Result: Successfully install, configure, migrate and upgrade infrastructure and related applications

Case 2 : BIG FOUR + PROVINCIAL GOVERNMENT AGENCIES

Problem: Government Agencies have a proposed but over-engineered Identity Access Management Security system design. They have an initial Business Requirement Document (BRD).

Solution: Re-evaluate system design. Understand business requirement. Listen and feel customer's pain.

Result: Come up with an improved system design with distributed architecture. More agile. More feasible. Utilize features that products are design for, orchestrate them together appropriately to fulfill customer requirement.

Case 3: TELECOMMUNICATION GIANTS

Problem: Technical problems come up in production Identity Access Management system, web servers and application servers that interfere business application login and registration processes.

Solution: Investigate problem. Root cause analysis. Provide quality and effective fix.

Result: Quick turnaround. Operations and business up run again. Customer pain relieved.

LET'S DISCUSS HOW WE CAN WORK TOGETHER TO SOLVE YOUR IT/ INFRASTRUCTURE CHALLENGES
